

# AUSTRALIAN EQUITIES FUND

## FUND STRATEGY

The objective of the Fund is to generate long term returns above the Benchmark by investing in a range of Australian and New Zealand listed securities. It is a long only portfolio of 20-45 stocks. The Manager will use CI's VoF research framework to assess individual companies and industries and to construct a portfolio that aims to achieve the risk and return objectives. This means that we seek to invest in quality companies with a strong value proposition. The Fund will generally be fully invested and the level of exposure to specific companies, industries and markets will be selected by CI's small, focused experienced team using our VoF investment process.
